Its a good skin yes, includes a hud and frame yes, new weapon animation yes. I was kind of disappointed with this. Many lines are still regular pirate in regular pirate voice, usually the beat boss ones. I do like what's done with the cannon balls (Making them yellow faces) and the gattling gun is nice. But the parrot is still the regular deal and doesn't look too great next to her. (Maybe it could have been some kind of non-animal flying robot or something fitting).

The yellow flower replacing the X in x marks the spot is a really nice touch too.

It would have helped too if this dlc had a video so you could hear the voice before deciding if you will get it. I wasn't able to find anything on her searching maniac pirate on youtube at the time.

I'd give it an okay, but two different voices is really distracting.

Pros

1. Good sprite
2. New Hud stuff
3. Cannon ball and X replacers are nice

Negs

1. Two voices on one character (One kind of upbeat and fun loving, One edgy)
2. No reskin on the parrot. Please note, this is not a new character. It is just a skin. i myself do not think a skin is worth the \$5.. Not at all.
