Premam Movie Download In Tamilrockers Tamill Listen, everyone needs to watch movies. Seriously, movies are life. It feels weird not to have movies in your life anymore after all these years. But you know what's even worse? When you go to see a movie and they don't have English subtitles. That feeling of being left out or alienated is soul crushing. It's even more so when the person next to you is trying to have a conversation with you, but your brain just refuses to focus because all you can think about is that what if he could read the subtitles too? That's the horror that brings us to this story. It goes beyond dealing with not being able to communicate, what else could be worse than being left out of the movie viewing experience? The answer is nothing. Because when you see your favorite foreign language movie subtitled in Tamil without any English, this story becomes your nightmare. This happened to an elderly lady in Chennai recently. While she was watching the latest release Die Hard in Tamil dubbed, she became alarmed when she realized there were no English subtitles. The lady who was a regular at the theater was not aware of the new changes being introduced by the organizers. But thankfully there was another person with her who could read them for her, and save her from a cinematic tragedy. When she asked to speak to the manager, the other patron within earshot immediately came to her rescue. He decided to take it upon himself to be her translator for this movie. So while they were watching together, he would explain what was happening in English while she read along in Tamil. And he wasn't doing it out of pity either; he actually enjoyed helping out this stranger. That's because he loves watching movies in Tamil, but also with English subtitles. And has done so with most of the new releases in the past. He thought it was silly that they hadn't bothered to subtitle their own movies when they are showing it in their home language. Isn't that like the ultimate form of reverse racism? When she confronted the theater manager about this, he was surprised and apologized profusely. He didn't even know this was a recent addition to his staff training and hadn't been implemented yet. But soon, they both realized this wasn't a problem anymore. A few days later, the manager stopped by her seat with a smile on his face and apologized for not having English subtitles. He said that he had made an announcement about this policy change and asked them all to be patient while they trained him more. So next time you're planning on going to watch a movie in Tamil, get ready for a new option at the theater: 'A Drama/Comedy/Family Movie' with Tamil subtitles. Maybe, just maybe some day we will actually be able to see movies in our native language again.
